Easy to dress in Yukata by yourself!
Separate Yukata will enrich your daily life!

How to put on a Yukata belt

1. Adjust the belt size

This is the readymade Yukata belt. To begin with, wrap the rubber belt around your waist, and adjust the size a little tightly with the band adjustment buckle. Otherwise Yukata belt will become loose.

2. Tie the rubber belt

Wrap and tie the rubber belt around your waist by hooking it in front.

3. Wrap the Obi

Hold the Tesaki with the right hand, and wrap it around the front waist and pass it to the left hand.

4. Tie the Obi

Put through the right hand into the opening behind the back bow, and pull out the end of Obi, and bring it to the right side. While holding the bottom left, fix the belt tightly by pulling it well toward the right side.

5. Fasten the Obi firmly

After letting Obi go through the fixing band, fold back the obi at the purple line in the picture, and push the end of Obi behind the bow to hide.

※Optional items

Tie Obijime cord and put Obi brooch

Letting the Obijime cord through the opening behind the back bow, tie it at front around the center of the Obi. Move the knot to the back to hide it. Put Obi brooch at the center front on the Obijime cord.

Adjust the shape and it's finished.

Adjust the shape to look balanced and symmetry.

It's more easy if you fasten the Obi at front, and then rotate it clockwise with 180 degree to the back.

We recommend that you will NOT do machine washing. At the cleaning, spread a little spray water, and put a cotton towel over it. Air dry outdoors on a hanger away from direct sunlight.
